POWERING DATA-DRIVEN SAFETY

Technology to transform workplace safety, productivity and performance

YOUR COMPLETE CLOUD-CONNECTED SOLUTION

There are lots of reasons to invest in connected safety technology to protect your people—from real-time visibility to faster and better emergency response to data-backed insights to optimize your operations. But why invest in Blackline Safety?

With over 100,000 device users in nearly 70 countries, our trusted cloud-connected safety solutions are proven by some of the world's leading global brands to protect their most at-risk workers, improve HSE practices and drive a more robust ESG profile.

Our connected safety hardware, software and services can meet you where you are today and scale as needed, providing you with technology that does what you need—now and in the future—without limitation. We help you optimize and grow your operations, while keeping your people safe and connected.

From Shell, FedEx and Ford to GE, Coca Cola and Amazon, our technology is used across more than a dozen industries to protect their most valuable asset—their people.

REAL-TIME VISIBILITY, REAL-TIME SAFETY

Real-time awareness of your people and places empowers a more informed response should the worst occur. G7 wearables and G7 EXO portable area monitors, with unmatched connectivity and accurate location technology, deliver ultimate visibility across your worksites. And when paired with 24/7 monitoring and real-time alerts, they power high performance emergency response and evacuation management to ensure no worker is left behind.

Our Blackline Live portal and Blackline Analytics software bring it all together by providing the real-time information you need to save lives now all while building a stronger safety program for tomorrow.

CONNECTED SAFETY SOLUTIONS

G7 PERSONAL SAFETY WEARABLES

- ✓ Integrated 4G cellular connectivity, with optional satellite for remote locations
- ✓ Connected out of the box, no Wi-Fi or Bluetooth required
- ✓ Configurable to address diverse safety needs—from lone worker to gas detection scenarios
- ✓ Four cartridge options, including diffusion and pump, with over 20 sensors tailor gas detection to your needs
- ✓ Patented SOS latch lets your people call for help from wherever they are
- ✓ Automated no motion, fall detection and missed check-in capabilities trigger an alert, even if the worker can't
- ✓ Two-way voice communication so first responders can connect directly with workers during an emergency

G7 EXO PORTABLE AREA GAS MONITOR

- ✓ Integrated 4G cellular connectivity, with optional satellite module for remote locations
- ✓ Drop and go deployment with instant cloud-connectivity, no networking required
- ✓ 100+ day battery life for unmatched reliability
- ✓ Over 20 gas sensors tailor gas detection to your needs
- ✓ Optional four-channel pump module samples up to four confined spaces or remote locations sequentially
- ✓ Built for extremes to perform in any condition

BLACKLINE LIVE

Your custom web portal allows you to manage your entire fleet and monitor your facility and workforce's wellbeing, helping you quickly view the safety status of any team member or worksite, in real-time.

- ✓ Configures, monitors and manages your connected safety solutions—easily and systematically
- ✓ Eliminates the need to manually compile and collect data, it does the work for you

BLACKLINE ANALYTICS

The industry's most comprehensive reporting platform delivers deep insights into your safety program.

- ✓ Includes 13 essential reports to help you understand usage, manage compliance and investigate incidents
- ✓ Facilitates live compliance visibility and reporting
- ✓ Provides optional custom reporting on virtually any metric based on your specific operational needs

INDUSTRY-LEADING CORE CAPABILITIES

With connected safety technology there's so much to think about. Ease-of-use and set-up. Monitoring and reporting capabilities. Security and privacy. And much more. Blackline Safety's complete connected safety solutions have all the tools you need—all in one place—to integrate seamlessly into your existing system and grow a data-driven safety program that sets you up for long-term success.

ROUND THE CLOCK LIVE MONITORING

We help you take safety to the next level with optional professional 24/7 live monitoring through our in-house, five diamond certified Safety Operations Center or global Alarm Receiving Center partners. Agents expertly manage emergency alerts in real-time and gather critical insights for an informed response.

- ✓ Alerts received in Blackline Live in under two seconds
- ✓ Alerts responded to by the SOC in fewer than 60 seconds
- ✓ Capable of sending mass notifications to streamline evacuation management

EASY IMPLEMENTATION

- ✓ No additional infrastructure, IT or installation required to deploy
- ✓ Streamlined administrative set-up—configure thousands of devices under one admin profile
- ✓ Limited training with intuitive hardware and software

HASSLE-FREE AUTOMATION

- ✓ Eliminate the need to manually compile and collect data from devices in the field
- ✓ Perform firmware upgrades over-the-air

RIGOROUS SECURITY & PRIVACY

- ✓ SOC-2 and GDPR certified
- ✓ Single sign-on and multi-factor authentication enabled
- ✓ Tools to detect, identify, report, notify you and resolve security incidents in a timely manner

Our industry-leading approach to security, compliance and controls meets the standards of world-leading global companies.
