

RENTAL EQUIPMENT & SERVICES

Keeping projects safe and on time.

Ensuring the safety of a small crew or several hundred tradespeople on any short-term project is a challenge. To keep crews safe, on schedule and within budget, Blackline Safety offers rental options for our complete portfolio of connected personal gas detectors, area monitors, lone worker wearables and accessories – all of which include **Blackline Live**, our online reporting and analytics software. Whether you need 1 device or 1000, we have you covered.

Projects change. Timelines change. Safety doesn't.

We understand projects can be unpredictable. Blackline's rental program provides the flexibility to adjust your rental plan on the fly.

- Daily, weekly and monthly rental options available.
- Cancel without penalty.
- Flexible, on-demand equipment – adjust inventory as project needs change.
- Same-day shipping or walk-in pickup available

Save costs and lives.

Staying on budget is a critical factor to determine a project's success. We understand the importance of controlling costs and have built our gas detection rental program with that top-of-mind.

- Instant access to industry-leading connected safety devices and software.
- With GPS location, misplaced devices can be easily located, greatly minimizing replacement costs or downtime.
- Pay for only the time and devices you need.
- Minimal maintenance means more time-on-tool.
- Blackline delivers a 5% surplus on the number of devices rented to ensure there is no downtime if devices need to be serviced or are temporarily misplaced.
- Device rentals include online software with built-in reports for full site visibility (including current compliance status) without added IT or set-up costs.

Simple. Robust. Configurable.

One incident could have tragic consequences – Blackline Rentals provide simple to operate devices so workers can focus on their job, not their equipment.

- With the push of a button, a worker is up and running in mere moments.
- Minimal training or maintenance required.
- Devices automatically update over-the-air so you'll always have the latest features without requiring users to dock the device.
- Every device configured or re-configured as needed with automatic updates.

Experience next level service that goes well beyond equipment.

We don't just take orders. Blackline takes a consultative approach to rental projects to ensure a well-planned and customized safety solution with devices is received.

- Collaborate with Blackline's team to develop a rental program optimized specifically for your project.
- Optional 24/7 safety monitoring by Blackline's Safety Operations Center.
- Robust data analytics services available.

Our technology is used across more than a dozen industries to protect their most valuable asset — their people.

PORTFOLIO overview

G7c CELLULAR & G7x SATELLITE connected wearables

- Gas monitoring (multi-gas diffusion and pump)
- Emergency SOS latch
- Zero network range limitations
- Two-way voice and messaging capability
- Optional push-to-talk functionality
- Over-the-air firmware and configuration updates
- Direct-to-cloud data streaming
- Assisted GPS for location tagged gas readings, alerts
