

A NEW ERA OF PROTECTION FOR THE FOOD PROCESSING INDUSTRY

ELEVATE SAFETY, DRIVE PERFORMANCE

At Blackline Safety, we understand the food processing industry faces many workplace challenges when it comes to ensuring the safety of your workers. Threats such as a potential **exposure to chemicals** like ammonia and sour gas, **hazards from working with machinery** and **working alone** in silos or across large facilities mean additional safeguards are required to protect your people. The need to act quickly, share information, stay connected, and minimize the impact to front-line workers and an industry distributing essential goods around the world is critical.

Blackline Safety's cloud-connected safety devices—our **G7 wearables** and **G7 EXO portable area gas monitors** can provide the protection and connection you need. Unmatched in their ease-of-use, they deploy in minutes right out-of-the-box and are **equipped with cellular or satellite connectivity—no wifi or Bluetooth** required.

This connectivity, combined with accurate location technology, offers the ultimate visibility across worksites. At the same time, they can power high-performance emergency response and evacuation management through **24/7 monitoring** and real-time alerts that make sure no worker is left behind. The **Blackline Live** web application and **Blackline Analytics** software bring it all together, bringing the real-time information you need to save lives now while building a stronger safety program for tomorrow.

SOLUTIONS AT A GLANCE

WORLD-CLASS, CUSTOMIZABLE COVERAGE YOU CAN COUNT ON

G7C / G7X WEARABLES FOR LONE WORKERS & GAS DETECTION

- ✓ Detects up to five gases in diffusion or pump mode
- ✓ Flexible and customizable gas sensor configurations tailored to your business needs
- ✓ Connects direct to cloud via cellular or satellite option
- ✓ Displays real-time visibility of your team, including location-stamped alert status, facilitating emergency response
- ✓ Information and insights for post-incident review and compliance checks

G7 EXO AREA MONITORS

- ✓ World's first direct-to-cloud area monitor
- ✓ Drop and go deployment that automatically links to the cloud—and the rest of your G7 network—for ultimate visibility into your worksite
- ✓ 100+ days of battery life for unmatched reliability
- ✓ Over 20 gas sensors to tailor your gas detection performance to your business needs
- ✓ Sample up to four confined spaces or remote locations sequentially
- ✓ Optional four-channel pump and satellite modules

HARNESS DATA, TRANSFORM PRODUCTIVITY

From the moment G7 devices are turned on and automatically connected to the cloud, they generate data. Powerful reporting tools work behind the scenes to analyze information and generate insights to optimize your safety program. The result? Better business decisions to help predict and prevent safety incidents.

BLACKLINE LIVE

- ✓ Customizable, cloud-hosted safety monitoring web application
- ✓ Configures, monitors and manages your connected safety solutions—easily and systematically
- ✓ Eliminates the need to manually compile and collect data
- ✓ Facilitates live compliance visibility and reporting

BLACKLINE ANALYTICS

- ✓ Logs usage and compliance data from the moment the hardware is turned on
- ✓ Creates 12 standard reports to record every bump test, calibration, gas exposure and usage session
- ✓ Generates insights to improve performance

**Flexible purchase options —
choose from rent, lease, own or
blend to fit into any budget!**
