

MULTI-LANGUAGE SUPPORT

BLACKLINE LIVE MONITORING SOFTWARE

Blackline Live login page translates according to chosen language

Blackline Live now supports 32 languages:

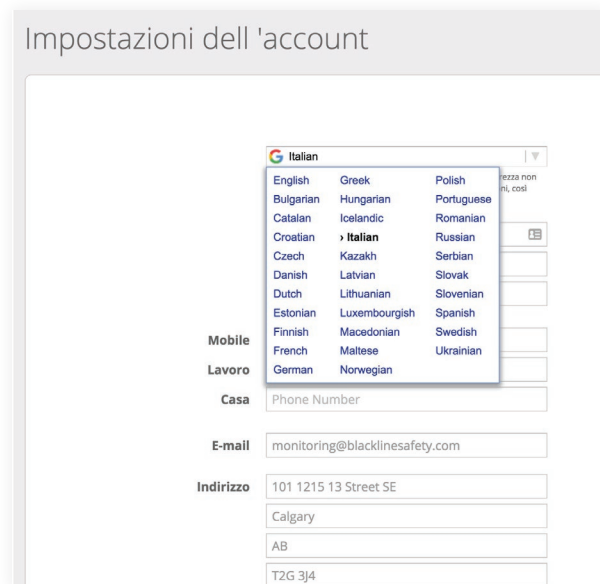

- English
- Bulgarian
- Catalan
- Croatian
- Czech
- Danish
- Dutch
- Estonian
- Finnish
- French
- German
- Greek
- Hungarian
- Icelandic
- Italian
- Kazakh
- Latvian
- Lithuanian
- Luxembourgish
- Macedonian
- Maltese
- Norwegian
- Polish
- Portuguese
- Romanian
- Russian
- Serbian
- Slovak
- Slovenian
- Spanish
- Swedish
- Ukrainian

Blackline Safety has recently updated its Blackline Live cloud-hosted safety monitoring software with support for multiple languages. This improved functionality is immediately available to all Blackline clients with no additional fees.

LANGUAGE OPTIONS

Blackline has partnered with Google, dynamically translating each page into 32 languages, supporting a broad range of alphabets.

Changing between languages is easy — when logged in, click your email address in top right of your browser. Click the Account Settings menu to load the settings page. A drop-down box offers a selection of languages. Selecting a language immediately triggers automatic translation into the chosen language. No save is required to keep the language change.

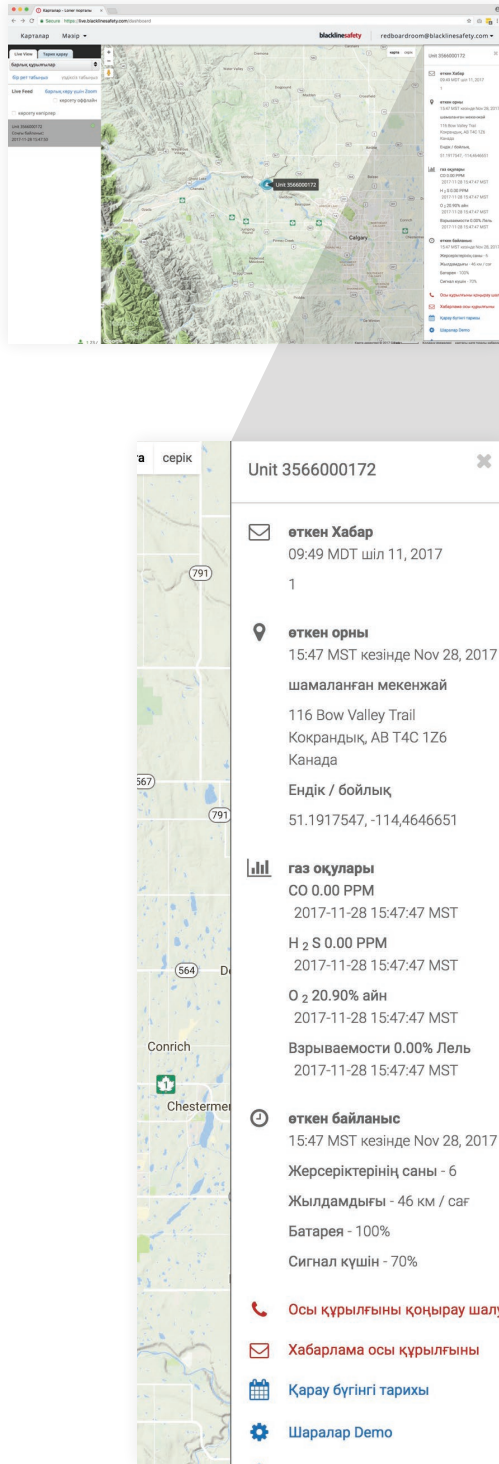

Selecting a language from the Account Settings page is easy — the language choice is stored for future Blackline Live sessions

“Helping businesses adopt industry-leading connected safety technology means that we must speak their language. Now Blackline Live does exactly that.”

— Gavin Boorman, Managing Director, Blackline Safety Europe

NOTES

The default Blackline Live language is English. If you choose a different language, your preference is stored in your browser as a cookie. For language translation to work, you must have cookies enabled within your browser. Additionally, you must select your preferred language for each computer and internet browser combination that you may use.
